

AEVA(Tas) CONVERSION SIG

ACTIVITY REPORT AS AT 22 June 2016

Our last meeting was on 3 May at the Civic Club in Davey Street. At this meeting we had a very informative presentation by Stephen Caplice. As a vehicle compliance officer Stephen talked about the requirements of EV converted vehicles to enable registration and the application of a “mod plate” to show that the vehicle is compliant.

The conversion group in Hobart has been slow to see a project commence, but now we have two.

Milliard Zeigler is looking at manufacturing a three wheel car from scratch and continuing his enquiries with Stephen Caplice regarding the form this might take.

More recently we have been informed that Les Gregson has a car ready to undertake a conversion. This is a 1998 Diahatsu station wagon. A group email has been sent out, but we don't yet have enough support to begin the project. We currently need some advice on design of the conversion.

The next meeting is scheduled for 2 August at the Civic Club commencing at 7pm.
