

Vinfast is Recruiting Engineers in Australia to design EVs for the world

Vinfast is a new vehicle company based in Vietnam that is currently designing and planning to manufacture EVs in Vietnam for their local market and export. Refer website <https://vinfast.vn/en>

There is also a large Engineering presence in Melbourne including an office in Port Melbourne and a vehicle Proving Ground and test facility in Melbourne's south-eastern suburbs, recently purchased from GM Holden.

Vinfast is recruiting for positions based in Melbourne and in Hanoi, Vietnam.

Presently we are looking for applicants with an Engineering degree, knowledge, experience and real know-how in the following areas:

- Overall electrical/electronic architecture of passenger vehicles (not just EVs)
- CAN bus communications, diagnostic tools and test equipment
- Over-the-air update of software and vehicle cyber security
- Infotainment systems and UI and UX (User Interface, User Experience) designers
- Electrical Load Analysis (sizing of Alternators and 12V Battery Ah/CCA selection)
- High Voltage (HV) wiring systems & all other HV EV components
- AC and DC charging systems; both on-board vehicles or off-board vehicle.
- Functional Safety standards (ISO 26262) related to passenger vehicles (not just EVs)
- Vietnamese language skills are advantageous but not mandatory

If you don't meet some of the criteria above but believe your skill set, knowledge and experience can benefit Vinfast, please also apply.

Above all, if you have a genuine interest and passion in EVs and an ability to travel overseas (subject to COVID restrictions at the time) and would like to be part of this exciting start-up company with a truly Global focus, please send your updated CV and covering letter explaining what you can bring to our awesome existing team, to v.allenh@vinfast.vn with subject "**Vinfast Job Application**".
