**Self-developed Super-Capacitor EDLC Obtained ISO/TS 16949:2009 Certificate**

15 April 2016 · Hong Kong **Man Yue Technology Holdings Limited** (“Man Yue Technology” or the “Group”) (stock code: 00894), one of the key global suppliers of Aluminum Electrolytic Capacitors (“E-Caps”) and Conductive Polymer Aluminum Solid Capacitors (“Polymer Caps”), today announces that, its wholly-owned subsidiary, Forward Electronics (Dongguan) Company Limited successfully obtained ISO/TS 16949:2009 certificate from the international certification company, BSI Management System for its product, Electric Double Layer Capacitor (“EDLC”) in April 2016. With the certificate, the application of EDLC extends from industrial products to automotive related products, thus the Group can directly supply its self-developed EDLC products to top-tier vehicle suppliers.

Being a new energy storage device and a multi-functional environmentally friendly energy saving and emission reduction solution, EDLC significantly reduces the electricity consumption of various applications by instantly recycling and storing residual energy as a backup power supply. The Group’s self-developed EDLC performs excellent in various aspects, including ultra-large capacitance, long lifespan, excellent low temperature endurance, high standard of safety and instant charge and discharge speed (in microsecond), making it a much better option than normal battery and capacitor. The Group initiated the research and development of EDLC. With a prominent and experienced research team, the Group provides tailor-made solutions, ranging from research on materials, one-stop production, modularisation, circuiting, integration and development of control system, for different applications. EDLC is widely applicable in 40 different areas, including new energy vehicles, idling start-stop system, smart grid, wind power electricity generation and others. Obtaining the certificate of ISO/TS 16949:2009 for EDLC proves that the Group’s strong ability and strength in research, design, production and quality management has achieved the international standard of the automobile industry.

**Mr. Chan Yu Ching Eugene, Managing Director of Man Yue Technology said,** ‘With the global economic development in the past years, the resources on earth has been stretched tightly, and the climate has drastically changed in recent years. To cope with shrinking resources and to mitigate the climate change, many countries have actively launched a series of environmental policies and expediting the implementation, especially for automobiles, one of largest carbon emission sources. China, the United States and Britain also actively promote the development of new energy vehicles. The Group believes that EDLC can effectively reduce the electricity consumption of new energy vehicles, and hence facilitating the development and popularisation of the new energy vehicles. With our EDLC accredited with ISO/TS 16949:2009, the Group is highly motivated to participate in research and development of innovative green energy storage products. Looking ahead, we will continue to develop environmental friendly energy storage products, with the aim to become the pioneer of environmental friendly development.’

-END-

### **About Man Yue Technology Holdings Limited**

Man Yue Technology was founded in 1979 and was listed on the Hong Kong Stock Exchange in 1997. The Group’s core business is the manufacture and sale of high technology electronic components, including Aluminum Electrolytic Capacitors (“E-Caps”), Conductive Polymer Aluminum Solid Capacitors (“Polymer Caps”), Electric Double Layer Capacitor (“EDLC”), EDLC Modules, Multi-layer Polymer Capacitors (“MLPC”), Powerfilm Capacitors and other innovative electronic components. As a key manufacturer of E-Caps and Polymer Caps, the Group’s renowned SAMXON<sup>®</sup> and X-CON<sup>®</sup> brands are respected for their advanced technology and superior quality. The Group operates state-of-the-art E-Caps manufacturing facilities in Dongguan, Wuxi and Jiangxi of Mainland China, with a total production capacity exceeding 1 billion pieces per month. It also owns aluminum foil factories located in Qingyuan and Ya’an of Mainland China producing foil for its own consumption. The Group has distribution offices located in Hong Kong, Mainland China and Taiwan. In 2011, Man Yue Technology was ranked second among the “Best Small-caps” in Hong Kong as selected in Finance Asia’s Best Managed Companies Poll 2011. In 2013, the Group obtained the Productivity and Quality Grand Award in the Hong Kong Awards for Industries, being organised by the Hong Kong Productivity Council. Last but not least, the Group won the Corporate Achievement Award at the Outstanding Import & Export Enterprise Awards 2014.
